	/James J. Seidleck/ Supervisory Patent Examiner, Art Unit 1796			

Continuation of 13. Other: The claims remain rejected by the prior art of record for the same reasons previously made of record in items 2-4 and 6 of the Final Office Action dated December 23, 2008. Particularly, as to the 35 U.S.C. 112, first paragraph, new matter rejection, there is insufficient written description support, specifically in the paragraphs of the CIP parents cited by Applicant on page 11 of the instant response, for a method of acidizing a subterranean formation providing a permeability-modifying aqueous fluid comprsing a hydrophobically-modified polymer formed from a reaction involving a hydrophilic monomer and a hydrophobically-modified hydrophilic monomer, wherein the resultant polymer comprises a polar polymer backbone and hydrophobic branch and has "a molecular weight in the range of about 100,000 to 10,000,000".
